Corrigenda

In Gregory Landini's article, "'On Denoting' against Denoting", in *Russell*, n.s. 18, no. 1 (Summer 1998), the following corrections are to be noted:

Page 55, line 16:

$$\hat{z}(z \text{ is a man}) \ \varepsilon \ \hat{a}\{a \subseteq \hat{z}(z \text{ is a mortal})\}$$

Page 69, lines 17–18:

(*) $\quad \vdash_T \backslash a = a$
$\qquad \sqsubseteq x_J \top a = \hat{z}(z{=}x).$

Page 69, lines 20–1:

$$\vdash_T \left[g(\backslash \hat{z}f\!z) = \quad \top \! \langle x_J \top g x \right.$$
$$\left. \qquad \qquad \sqsubseteq y_J f\!y = (x{=}y) \right]$$
$$\sqsubseteq g(\hat{z}f\!z)$$

Page 77, line 1:

$$(\exists x)(\text{Hen}(x) \ \& \ \text{Bought}(R, x) \ \& \ \text{Vaccinated}(W, x)).$$
